# INSPIRE Geoportal

- Central point of access to all data shared under INSPIRE:
  - harvests national catalogues (does not store any data)
  - allows to search, view and download datasets
  - available filters:
    - priority datasets for environmental reporting
    - INSPIRE data themes

INSPIRE GEOPORTAL

Enhancing access to European spatial data

European Commission > INSPIRE > Geoportal

[Home](#) [Priority Data Sets Viewer](#) [Thematic Viewer](#) [Harvesting status](#) [Find out more about](#)

### Welcome to the INSPIRE Geoportal

The INSPIRE Geoportal is the central European access point to the data provided by EU Member States and several EFTA countries under the INSPIRE Directive. The Geoportal allows:

- monitoring the availability of INSPIRE data sets;
- discovering suitable data sets based on their descriptions (metadata);
- accessing the selected data sets through their view or download services.

The metadata used in the Geoportal are regularly harvested from the discovery services of EU Member States and EFTA countries. The status of harvesting is available [here](#).

Feedback regarding the functionality as well as data set availability is welcome [here](#).

#### Priority Data Sets Viewer

Credits: Map data: Google | Map style: snazzymap | Icons: Nick Roach

The application displays the availability and provides access to the selected priority data sets **1** used for environmental reporting. It allows filtering by environmental domain, environmental legislation and country, as well as individual priority data sets.

[Browse Priority Data Sets](#)

#### INSPIRE Thematic Viewer

Credits: Map data: Google | Map style: snazzymap | Icons: INSPIRE

The application displays the availability and provides access to all EU MS data sets falling under the scope of INSPIRE Directive filtered by data themes and countries (i.e. Annex I, II and III).

[Browse INSPIRE Thematic Data Sets](#)

# INSPIRE Geoportal – Ongoing developments

- Re-engineered **backend** based on GeoNetwork:
  - aligned with GeoNetwork's plan to move to **micro-services**
  - main focus is on the **harvesting module**
  - direct contribution to the main branch (no forks) to ensure **sustainability**
  - **containerisation** & **cloud** hosting
- New **frontend** to include an additional filtering option:
  - by **high-value datasets** – as specified in the upcoming Implementing Act following the 2019 Open Data Directive

# INSPIRE Reference Validator

- Reasons to develop a common validator:
  - help Member States data providers **test resources** (metadata, data sets and network services) against INSPIRE requirements
  - help INSPIRE coordinators (DG ENV, JRC & EEA) and national coordinators **check INSPIRE implementation progress** in Member States & across Europe
    - support INSPIRE Monitoring and Reporting
  - help solution providers **check their software solutions** against INSPIRE requirements

# INSPIRE Reference Validator – Releases

## Annual releases

As mentioned above, several releases of the INSPIRE Reference Validator are scheduled each year with the main goal of concentrating breaking changes in the first half of the year in order to produce the major release used for the end-of-year Monitoring process already in June. The scheduled annual releases are described in detail in the next sub-sections. In addition to the different infrastructure and deployment environments, the different releases are managed using different branches of the *ets-repository* repository.

For simplicity, the descriptions make explicit reference to releases in the years 2021/2022, but the same release schedule will be applied consistently over the following years:

- **v2021.1 - 15/03/2021:** it includes both breaking and non-breaking changes.
- **v2021.2 - 15/06/2021:** it includes both breaking and non-breaking changes.
- **v2022.b - 15/06/2021:** it includes both breaking and non-breaking changes which are planned to become effective (for Monitoring purposes) in the following year. **used for Monitoring and Reporting 2021**
- **v2021.3 - 15/09/2021:** it only includes non-breaking changes, so that any INSPIRE resource passing the test in the previous release automatically passes the same test in this release. This release is the one used for the end-of-year Monitoring process.
- **v2022.0 - 15/01/2022:** it includes both breaking and non-breaking changes, including those available in the beta instance of the previous year.

- ▼ Notes on MDi1.1 and MDi1.2 evaluation

The evaluation of these indicators involves a validation of the collected metadata through the [Reference Validator \(v2020.3\)](#).

In case of a metadata document aligned with the *INSPIRE MD TG v2.0*:

- ✓ if the recognized INSPIRE Resource Type is "**dataset**" or "**series**" the applied executable test suite is "**Conformance Class 2b: INSPIRE data sets and data set series metadata for Monitoring**".
- ✓ if the recognized INSPIRE Resource Type is "**service**" the applied executable test suite is:
  - ✔ "**Conformance Class 4: INSPIRE Network Services metadata**", if the service is a Network Service (service type equal to "view", "download", "discovery" or "transformation")
  - ✔ "**Conformance Class 5: INSPIRE Invocable Spatial Data Services metadata**", if the service is an Invocable Spatial Data Service (service type equal to "other")

# Monitoring and Reporting 2020 - Conclusions

- Process prepared well in advance:
  - clear release plans and changelogs for the software used
  - clear communication on testing periods
  - availability of tools for Member States to pre-calculate the indicators
- Results:
  - on average, implementation improved compared to 2019
    - improved conformity of metadata (including transition to TG v.2.0)
    - improved accessibility of data sets
  - full implementation still to be achieved
  - implementation still heterogeneous across Member States

# Thank you!
