INSPIRE as an open infrastructure

Marco Minghini

European Commission, Joint Research Centre (JRC)

1 June 2023

INSPIRE Directive

DIRECTIVE 2007/2/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

of 14 March 2007

establishing an Infrastructure for Spatial Information in the European Community (INSPIRE)

- Aims to create a **European SDI** to support EU environmental policies aligned with the current **green and digital** policy context.
- Provides a comprehensive framework for **interoperability of spatial data**:
 - **data** sharing
 - data & service discovery (**metadata**)
 - **network services**
- based on the SDIs established and operated by the EU Member States.

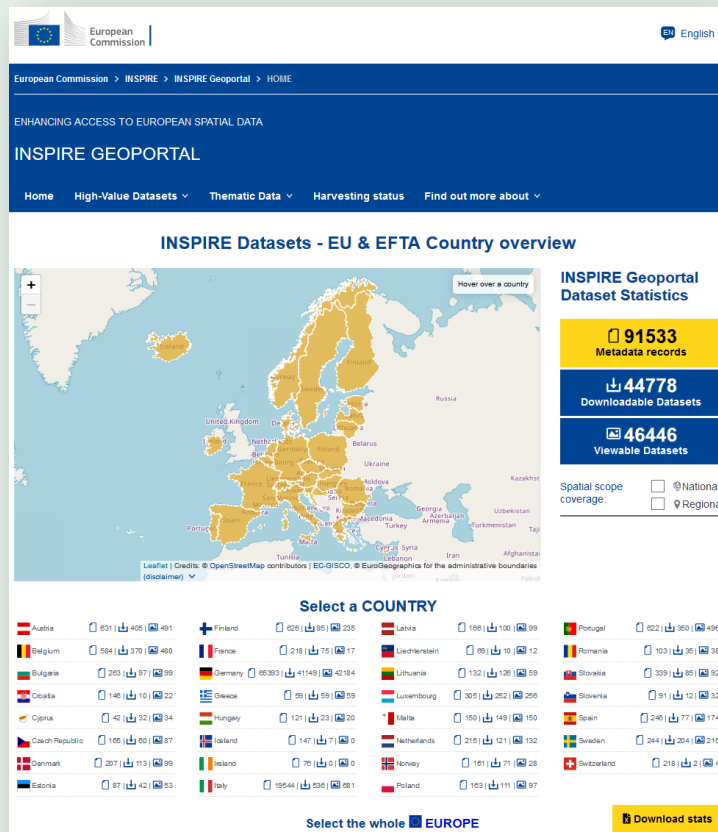

<https://eur-lex.europa.eu/legal-content/EN/ALL/?uri=CELEX:32007L0002>

INSPIRE: an open infrastructure

- The INSPIRE legal framework led to the development and evolution of an **open infrastructure**
 - central components based on reusable, **open source** software solutions
 - technology-agnostic thanks to the reuse of **open standards**
 - inclusive, flexible and **open governance** approaches
 - library of **open educational material**
 - **open repositories** for artefacts and resources
 - future stronger link with EU **open data** policies
 - **community**

Open source – INSPIRE central components

- INSPIRE (legal framework) as a **catalyst** for technological innovation
 - central components based on reusable, open source software solutions

INSPIRE Geoportal, based on GeoNetwork opensource

The screenshot shows the 'INSPIRE Validator - Test selection' page. It has a navigation bar with 'European Commission > INSPIRE > Validator > Test selection'. The main heading is 'INSPIRE Validator - Test selection'. Below this, there's a 'Configure your test' section with options to select the INSPIRE resource (Metadata, View Service, Download Service, Discovery Service, Data set) and the Technical Guidelines version (Version 1.3 - DEPRECATED, Version 2.0). There's also a section to select the type of metadata record(s) to be tested (Data sets and data set series, Network Service, Spatial Data Service). An 'Advanced options' button is present. The 'Provide the resource to test' section includes a file upload button and a text area for providing a label for the test report. At the bottom, there's a 'Start test' button.

INSPIRE Reference Validator, based on the ETF Testing Framework

The screenshot shows the 'INSPIRE Registry' page. It has a navigation bar with 'European Commission > INSPIRE > INSPIRE registry'. The main heading is 'INSPIRE Registry'. Below this, there's a search bar and a link to a survey. The 'INSPIRE registry' section includes a description of the registry and its purpose. The 'Registry manager' section lists the European Commission, Joint Research Centre. The 'Other formats' section shows links to XML and ISO 19135. The 'Registers' section lists various registers including 'INSPIRE application schema register', 'INSPIRE code list register', 'INSPIRE enumeration register', 'INSPIRE feature concept dictionary', 'INSPIRE glossary', 'INSPIRE layer register', 'INSPIRE media-types register', 'INSPIRE metadata code list register', 'INSPIRE reference document register', and 'INSPIRE theme register'. At the bottom, there's a pagination bar showing 'Showing 1 to 10 of 10 entries'.

INSPIRE Registry, based on the Re3gistry

Open standards

Open
Geospatial
Consortium.

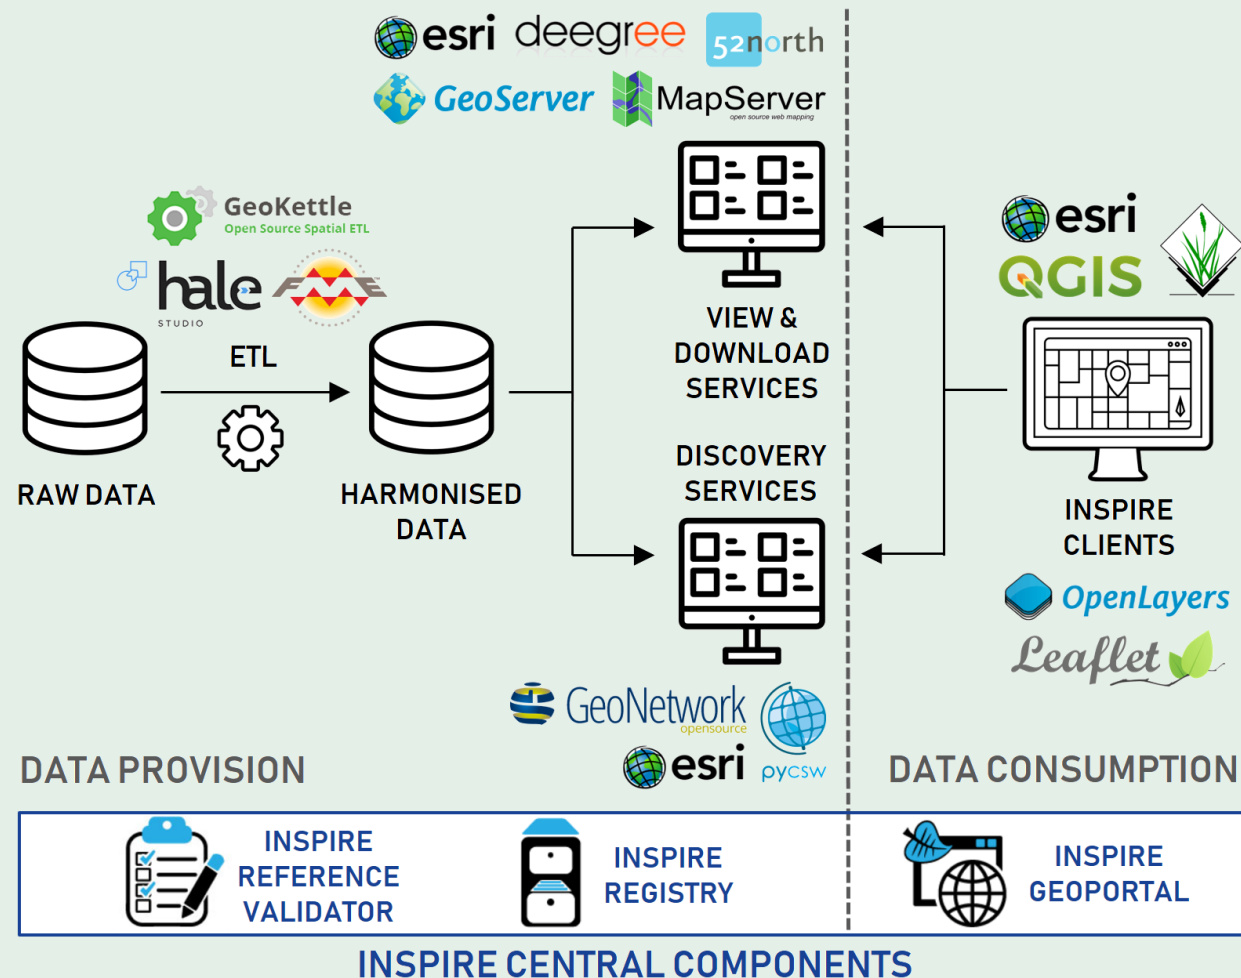

- INSPIRE is by nature based on **open standards** – probably the largest uptake of OGC standards worldwide!
 - **benefits** for all players: data providers, users & standardisation bodies
- Only mature and **well-supported standards** should **be considered** for INSPIRE technical provisions:
 - selected standards should not only satisfy the legal requirements, but also simplify the lives of providers/users!

European
Commission

Open standards – Implementation stack

- INSPIRE-related software for data provision and consumption

Open governance approaches

- Inclusive and **open governance approach** since the beginning:
 - broad spectrum of users & implementers
 - INSPIRE MIG for organisational, legal and technical matters
- More **agile governance approaches** would help:
 - **community-driven** & based on **online collaborative platforms** 

Open governance approaches

- Inclusive and **open governance approach** since the beginning:
 - broad spectrum of users & implementers
 - INSPIRE MIG for organisational, legal and technical matters
- More **agile governance approaches** would help:
 - community-driven & based on **online collaborative platforms** 
- **INSPIRE Good Practices**
 - a mechanism to introduce new approaches (standards, technologies, etc.) in INSPIRE

<https://inspire.ec.europa.eu/portfolio/good-practice-library>

Good Practice documents

Candidate

[GeoJSON encoding of INSPIRE Datasets](#)

Endorsed

[GeoDCAT-AP](#)

[SDMX for Human Health and Population Distribution](#)

[OGC API – Features as an INSPIRE download service](#)

[OGC SensorThings API as an INSPIRE download service](#)

[Building one access point to dispersed data sources](#)

[Making spatial data downloadable via WMS services](#)

[OGC compliant INSPIRE Coverage data and service implementation](#)

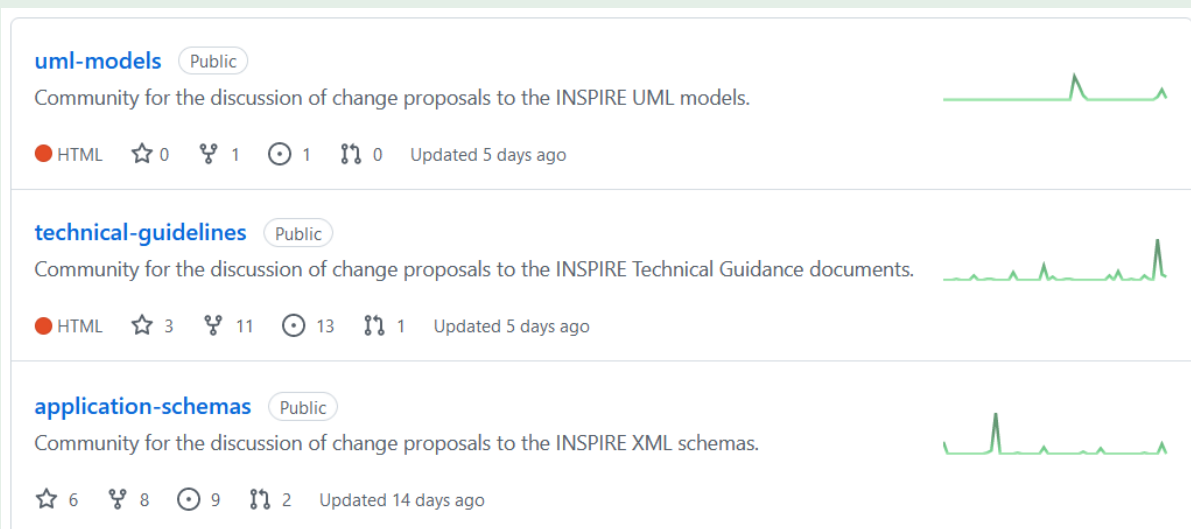

[GeoPackage encoding of INSPIRE datasets](#)

[Data-Service Linking Simplification](#)

Open governance approaches

- Inclusive and **open governance approach** since the beginning:
 - broad spectrum of users & implementers
 - INSPIRE MIG for organisational, legal and technical matters
- More **agile governance approaches** would help:
 - **community-driven** & based on **online collaborative platforms** 
- **INSPIRE Good Practices**
 - a mechanism to introduce new approaches (standards, technologies, etc.) in INSPIRE
- **INSPIRE artefacts**
 - a governance process to manage changes/updates to INSPIRE TGs, schemas and UML models

<https://github.com/INSPIRE-MIF>

The screenshot displays the INSPIRE-MIF GitHub organization page. It features three repositories, each with a description, a 'Public' badge, and a green commit history graph. The repositories are:

- uml-models**: Community for the discussion of change proposals to the INSPIRE UML models. It has 0 stars, 1 fork, 1 issue, and 0 pull requests, updated 5 days ago.
- technical-guidelines**: Community for the discussion of change proposals to the INSPIRE Technical Guidance documents. It has 3 stars, 11 forks, 13 issues, and 1 pull request, updated 5 days ago.
- application-schemas**: Community for the discussion of change proposals to the INSPIRE XML schemas. It has 6 stars, 8 forks, 9 issues, and 2 pull requests, updated 14 days ago.

Open educational material

- Collection of openly-accessible **training modules** developed over the years
- User and developer guides for the software tools

Training library

List of current and updated training modules

MODULE METADATA	MODULE LINK
Monitoring and understanding emerging geospatial technologies	Access the module
From INSPIRE to e-Government	Access the module
Principles for Data and Metadata Harmonisation according to INSPIRE	Access the module
INSPIRE Network Services (UPDATE)	Access the module
Short video on benefits of INSPIRE	View the video

<https://inspire.ec.europa.eu/portfolio/training-library>

Open repositories for artefacts and resources

- **INSPIRE-related resources** are all freely and openly available (CC licenses)
 - INSPIRE TGs
 - INSPIRE UML models
 - INSPIRE schemas
 - Abstract and Executable Test Suites (ATS and ETS)

<https://github.com/INSPIRE-MIF/technical-guidelines>

<https://github.com/INSPIRE-MIF/uml-models>

<https://github.com/INSPIRE-MIF/application-schemas>

<https://github.com/inspire-eu-validation>

INSPIRE Technical Guidance documents

The purpose of this repository is to host the INSPIRE Technical Guidance documents (hereafter INSPIRE TGs) and manage the changes to them.

The [issue tracker](#) of this repository should only be used to submit and discuss change proposals to the TGs. Should you have any questions relating to the use of the TGs or relating to general INSPIRE matters please use the [INSPIRE helpdesk](#).

The INSPIRE TGs describe detailed implementation aspects and relations with existing standards, technologies, and practices, see also <https://inspire.ec.europa.eu/inspire-technical-guidance/57753>.

Status

All INSPIRE TGs will be converted from the [current pdf format](#) to the AsciiDoc format and published in this repository, according to the order and timing defined in the [conversion plan](#).

Currently, the following TGs have been converted:

- Metadata
 - [Metadata-iso19139](#)
- Services
 - [Download Services](#)
 - [View Services](#)
- Data
 - [Coordinate reference systems](#)
 - [Elevation](#)
 - [Environmental Monitoring Facilities](#)
 - [Geographical Grid Systems](#)
 - [Hydrography](#)
 - [Land Use](#)
 - [Protected Sites](#)
 - [Soil](#)

Link with open data policies

- INSPIRE does not require that data are shared under open licenses.
- Open Data Directive (2019) & Implementing Act on high-value datasets (2022)
 - datasets the **re-use** of which is associated with high **socio-economic benefits**
- To be made available
 - **for free**, under **open access license** (CC BY 4.0 or less restrictive)
 - in **machine-readable** formats
 - via **APIs** and (when relevant) as bulk downloads

- Categories of high-value-datasets:

Geospatial

*Earth observation
and environment*

Meteorological

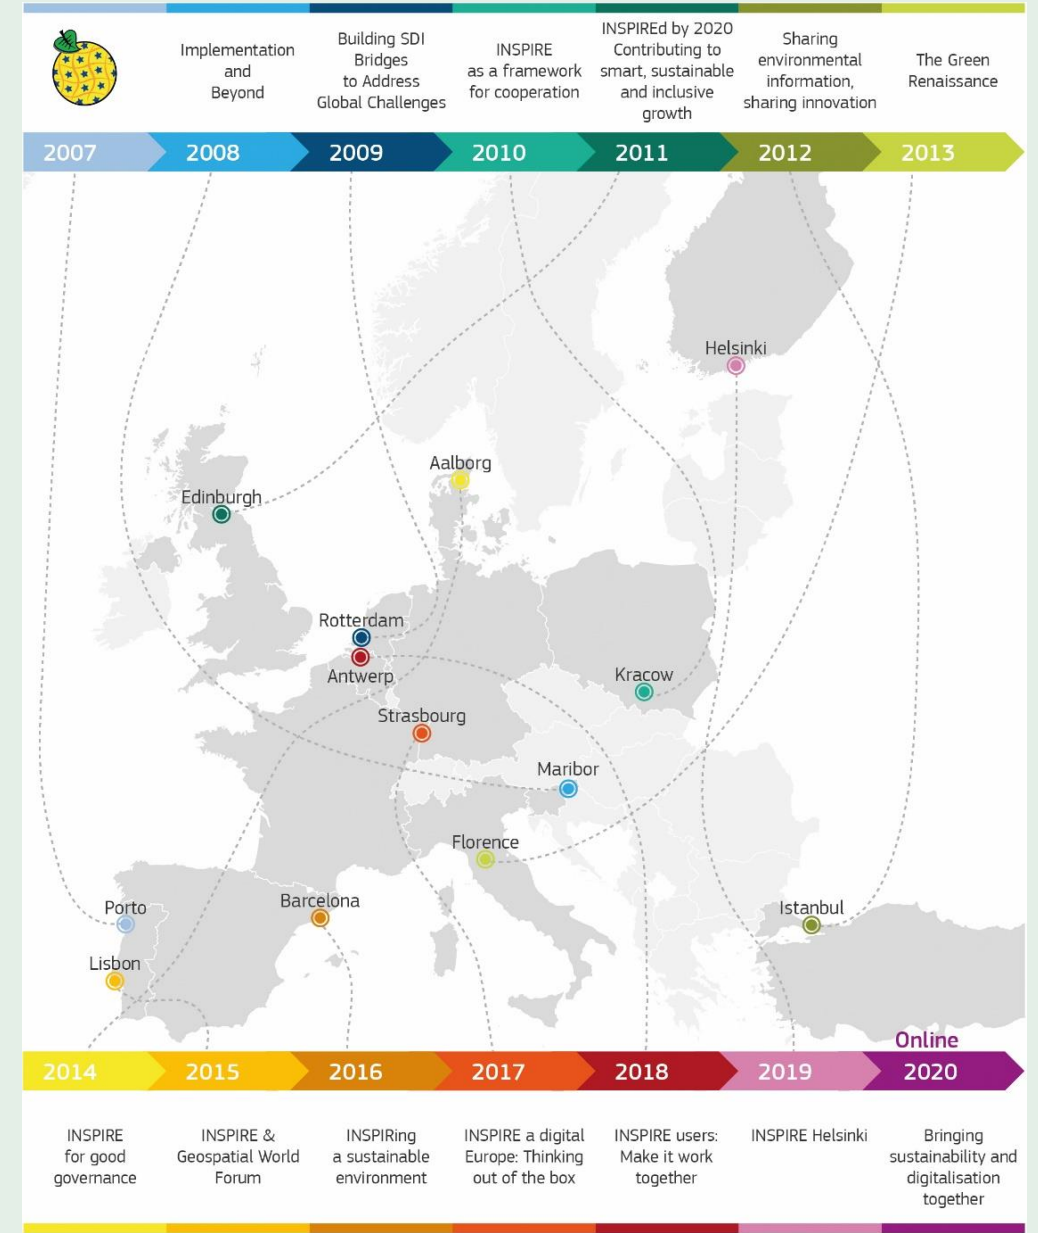

Statistics

*Companies and
company
ownership*

Mobility

Community

“A technical infrastructure is only as good as the social infrastructure underpinning it”

New JRC Science for Policy Report

- **Title:** INSPIRE – A Public Sector Contribution to the European Green Deal Data Space
